

## THE SOLUTION: ARX ABaC

The **ABaC System** is a robust, lightweight and permanent non-hazardous defensive solution that protects vessels from intruders. It is a plastic modular system that straps to the guard rail of ANY existing ship, offering complete denial of access by preventing ladders and climbing poles from attaching.

### FUNDAMENTAL BENEFITS:

#### QUICK AND EASY TO INSTALL

It takes no more than a minute to install and remove a section.

#### PORT OPERATIONS

The barriers remain on the vessel during port and transfer operations.

#### HAZARD FREE

No harm to crew during installation.

#### PRIMARY DEFENCE

As showcased in BMP5, first line of protection for vessels.

#### LONG WARRANTY

We want this product to last as long as your vessel, so we guarantee it.

#### FIRE AND CHEMICAL PROTECTION

Tested and certified against fire retardants and chemical corrosion.

#### UV PROTECTION

Chemically enhanced plastic to provide lasting UV protection.

#### LOW COST

A permanent, affordable defence against piracy, within your reach.

#### RUST FREE

The system does not corrode or rust under the duress of sea water.

#### NO GREEN WATER

The ABaC System has been designed to let water drain freely.

#### STORAGE

Simple stacking design, not bulky or numerous parts.

#### UNIVERSAL DESIGN

The product will fit any design of vessel, even where there is no guard rail.
